

DUSK Suite, a Multi-Protection Solution

Mobility and a rigid regulatory climate, focused on controlling corporate information, significantly challenge today's IT administrators charged with securing organizational data and networks.

In response, the **DUSK Suite**, a configurable software solution, reduces mobile vulnerabilities, raises situational awareness, and prevents data leakage.

DUSK Suite Protection offers a multi-protection license package that lets you shape the solution as you need it. DUSK Suite multi-protection includes:

- **DUSKWatch** to control peripherals and mobile devices on your network with audit and tracking capabilities.
- **DUSK-USB** to protect USB keys and HDDs, memory cards and Firewire ©
- **DUSK-CD** to protect CD-ROMs and DVDs.

DUSK-USB Corporate Edition for USB Device Protection

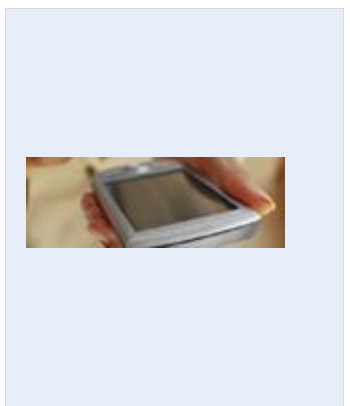

DUSK-USB Corporate Edition for Mobile Device protection secures with simple drag'n drop encryption technology. Hardware independent.

- Centralized or decentralized protection installations
- Drag n' drop encryption
- Works with limited (User) and unlimited (Administrator) privileges
- Protects USB mass storage devices (USB flash memory drives, USB hard disk drives, memory card, Firewire ©) regardless of size, brand or type
- Reads, writes and encrypts outside organization's network without restriction
- Driverless (no software required on host Pc)
- Full device protection preventing misplaced files or virus introduction
- Multiple secured partitioning of USB drives possibilities
- Password recovery and Administrator recovery key
- Bilingual solution (English / French)
- Active Directory configurable
- Records activities of files copied onto protected USB devices for better risk assessment when a protected device is lost
- Back-up and shadow copy of encrypted data content for easy data recovery
- DLP Lite Functions

DUSKWatch for Mobile Device Control

Should your organization's security policy require that mobile data be encrypted at all time, or should you wish to prevent illegal intrusions on your network, DUSKWatch will provide you peace of mind. DUSKWatch controls peripherals connected to your network and keeps track of mobile device activities.

- Compels the use of authorized and DUSK-USB protected devices
- Authorizes selective USB devices or specific secured partitions of USB drives
- Controls USB mass storage devices such as flash drives, USB HDD, iPods, cameras, memory card readers, floppy disks, CD-ROMs and DVDs
- White and Black Lists of devices
- Read-only option of unprotected USB devices
- Informs on mobile device activities on network to better identify vulnerable workstations to illegal intrusions
- Records logs on files leaving your network on DUSK-USB protected devices
- Controls file formats and data file volume leaving your network
- Log alerts and emails alerts
- Keeps back-up and shadow copies of DUSK-USB protected devices
- Emergency setting to withdraw all permissions at once
- Works with limited (User) and unlimited (Administrator) privileges
- Active Directory configurable

DUSK-CD Corporate Edition for CD-ROMs and DVDs

DUSK-CD Corporate Edition is a protection to secure mobile data on CD-ROMs and DVDs. Burned directly onto the disk with the protected data; DUSK-CD lets Users decrypt files from any workstation.

- Drag n' drop encryption
- Reads and decrypts files outside organization's network without restriction
- Enables to add files to DUSK-protected CD-ROMs and DVDs from the workstation on which the DUSK-CD installer is located
- Works with limited (User) and unlimited (Administrator) privileges
- Administrator recuperation key for lost or forgotten User passwords
- Active Directory configurable

DUSK Suite Specifications and Requirements

DUSK Suite Specifications	
Security	Public Key Encryption
Protection	FIPS 140-2
User Password Structure	Configurable by Active Directory
Algorithm Encryption	AES - 128/192/256 bits - CBC/ECB/OFB/CFB Mode
Strong Authentication	Using Password and Private Key File
RSA Algorithm	RSA 1024/2048/4096
Canadian Solution	English, French
DUSK Suite Requirements	
Application Volume Size	20 MB
Operating Systems	- Windows XP 32bits - Windows Vista 32bits/64bits - Windows Seven 32bits/64bits - Windows Server 2003 32bits - Windows Server 2008 32bits/64bits
Virtualization	- Windows Terminal Server - Citrix Terminal Server
Database	MSSQL / MySQL / PostGreSQL
Installation	MSI file: Can be installed manually, using SMS or using GPO
Configuration	Active Directory / GPO
