

DUSK-CD Unlimited to protect your CD-ROMs and DVDs

DeltaCrypt DUSK-CD Unlimited protection enables to secure sensitive data burned on disks. Give your mobile data and your backup copies the level of security they deserve. It is not because a CD-ROM or DVD holds copies of original files, otherwise available on your network, that it does not deserve all the protection it can get.

Compliance and Legislation

Spending on security technologies is being driven by a number of concerns – regulatory compliance, identity theft and identity management being the top three. The following legislations require encryption of stored information:

- HIPAA (US - Health Insurance Portability and Accountability Act)
- SOX (US - Sarbanes Oxley)
- GLBA (US - Gramm-Leach-Bliley)
- California SB 1386 (US)
- PIPEDA (Canada - The Personal Information Protection and Electronic Documents Act)
- DPA (UK- Data Protection Act)

DeltaCrypt's DUSK-CD Unlimited Protection enables Users to secure mobile data on disks with simple drag'n drop encryption technology. Its uniqueness resides in its easy-to-use features combined with public key encryption to protect disks.

How DUSK-CD Unlimited works

- Before using DUSK-CD Unlimited, a DUSK-CD Unlimited installer first need to be installed on the computer
- Following such installation, DUSK-CD Unlimited requires to then be burned onto the CD-ROM or DVD
- Users are led to configure a User password to open up DUSK-CD Unlimited. Once opened, to encrypt files, the User drags 'n drops files from the DUSK-CD Unlimited left pane showing the workstations to the DUSK-CD Unlimited right pane representing the disk.
- When done with the selection, the burning feature is launched to save the secured files onto the disk.

Benefits

- Burns DUSK-CD Unlimited directly onto the disk, enabling file decryption from any workstation
- Reads and decrypts files without restriction
- Enable to add files to DUSK-protected CD-ROMs and DVDs from the workstation on which the DUSK-CD Unlimited installer is located

DUSK-CD Unlimited protection features

Drag'n Drop Encryption	Works with limited (User) and unlimited (Administrator) privileges
Works with CD-ROMs and DVDs	Windows XP, Vista, Seven
Unlimited protection installation	Uses Windows Api when available or NERO®. Upon request, may use any other burning tool.
No software on host PC required (driverless) to decrypt files outside the network	

Why DeltaCrypt?

DeltaCrypt was created to provide organizations management with genuine peace of mind for more and more valuable corporate mobile data. From customers' data to collaborative exchanges and communications, DeltaCrypt offers protection for sensitive data against external and internal intrusions.

Complete range of encryption products

DeltaCrypt offers a complete range of public key encryption applications. Whether you wish to protect your PCs, data exchanges, emails, USB flash memory drives, as well as your backups, DeltaCrypt offers you the right solution.

Custom-Built Solution

Don't let your organization's special requirements keep you from protecting sensitive corporate data. Any of the DeltaCrypt public key encryption solutions can be adapted to your environment.

FIPS 140-2 Certification

Pending application for FIPS 140-2 Certification (the Federal Information Processing Standard--FIPS-- Publication 140-2 is a U.S. government computer security standard for accrediting cryptographic modules).

Strong Presence in security-conscious organizations and Industries

Governments, R&D, High Tech, Financial Institutions, Lotteries, Oil & Gas, etc.

Canadian software products

DeltaCrypt Technologies Inc. is a privately-owned Canadian company located in the Province of Quebec.

Bilingual Solutions and Support
