

DUSK-USB Corporate Edition for USB Device Protection

According to Privacy Rights Clearinghouse, **500M** records containing sensitive personal information were involved in security breaches in the U.S. since January 2005. Mobile devices are indispensable today. Whether it is mobile laptops, smart phones, USB drives, Pc tablets, they are part of everyone's life. Unfortunately, they also represent a greater risk of mobile data loss. Can you afford to lose your sensitive files this way?

DUSK-USB Corporate Edition

DeltaCrypt's DUSK-USB-Protection for USB drives enables to secure mobile data on USB flash drives with simple drag'n drop encryption technology. Its uniqueness resides in its easy-to-use features combined with public key encryption to protect USB mass storage devices.

How DUSK-USB works

Entering a User password opens up the DUSK-USB Corporate Edition application. Once opened, to encrypt files, simply drag 'n drop files from the DUSK-USB Corporate Edition left pane showing the workstations to the DUSK-USB Corporate Edition right pane representing the USB drive. The reverse action is also true to decrypt files placed onto DUSK-USB-protected drives.

For assistance, your administrator recuperation key may help accessing data on a protected drive.

Benefits

- Installs on various USB mass storage devices regardless of size, brand or type
- Driverless solution
- Single Protected Partition That Fills the Whole Drive
- Easy intuitive encryption

DUSK-USB Corporate Edition Protection Features

Drag'n Drop USB Key Encryption	No Software on Host PC required (driverless)
Works with USB flash memory drives, USB hard disk drives, memory cards, Firewire ©	Combines unprotected partition to protected partition
Works with limited (User) and unlimited (Administrator) privileges	Windows XP, Vista and Windows 7, Server 2003/2008
Administrator recuperation key and temporary passwords	Requires the DeltaCrypt Master Console

DUSK-USB Corporate Edition is an affordable USB drive protection that lets anyone secure the sensitive files that require protection while others remain accessible on the drive. No training required!

DeltaCrypt Master Console

The DeltaCrypt Master Console offers complementary functionalities to other DeltaCrypt Solutions. Designed for the IT administrator, the Console provides user assistance with data recuperation and temporary password tools. It also recovers DUSK-USB mobile protection backup copies.

In addition to being an essential help to users, the DeltaCrypt Master Console provides all monitoring reports thereby increasing situational awareness on corporate networks. By having better knowledge on network activities, management are also supporting in making right decisions about security.

DeltaCrypt Master Console
