

DUSK-USB Home Edition for Personal USB Device Protection

According to Privacy Rights Clearinghouse, **500M** records containing sensitive personal information were involved in security breaches in the U.S. since January 2005. Mobile devices are indispensable today. Whether it is mobile laptops, smart phones, USB drives, Pc tablets, they are part of everyone's life. Unfortunately, they also represent a greater risk of mobile data loss. Can you afford to lose your sensitive files this way?

DUSK-USB Home Edition for USB Devices

DeltaCrypt's DUSK-USB-Protection for USB drives enables to secure mobile data on USB flash drives with simple drag'n drop encryption technology. Its uniqueness resides in its easy-to-use features combined with public key encryption to protect USB mass storage devices.

How DUSK-USB works

Entering a User password opens up the DUSK-USB Home Edition application. Once opened, to encrypt files, simply drag 'n drop files from the DUSK-USB Home Edition left pane showing the workstations to the DUSK-USB Home Edition right pane representing the USB drive. The reverse action is also true to decrypt files placed onto DUSK-USB-protected drives.

Benefits

- Installs on various USB mass storage devices regardless of size, brand or type
- Driverless solution
- Lets User determine if a file needs protection on his drive or not
- Easy intuitive encryption

DUSK-USB protection features

Drag'n Drop USB Key Encryption	No Software on Host PC required (driverless)
Works with USB flash memory drives, USB hard disk drives, memory cards, Firewire ©	Combines unprotected partition to protected partition
Works with limited (User) and unlimited (Administrator) privileges	Windows XP, Vista and Windows 7, Server 2003/2008

DUSK-USB Home Edition is an affordable USB drive protection that lets anyone secure the sensitive files that require protection while others remain accessible on the drive. No training required!

Why DeltaCrypt?

DeltaCrypt was created to provide organizations management with genuine peace of mind for more and more valuable corporate mobile data. From customers' data to collaborative exchanges and communications, DeltaCrypt offers protection for sensitive data against external and internal intrusions.

Complete range of encryption products

DeltaCrypt offers a complete range of public key encryption applications. Whether you wish to protect your PCs, data exchanges, emails, USB flash memory drives, as well as your backups, DeltaCrypt offers you the right solution.

Custom-Built Solution

Don't let your organization's special requirements keep you from protecting sensitive corporate data. Any of the DeltaCrypt public key encryption solutions can be adapted to your environment.

FIPS 140-2 Certification

DeltaCrypt Encryption Applications are FIPS 140-2 Certified (the Federal Information Processing Standard--FIPS--Publication 140-2 is a U.S. government computer security standard for accrediting cryptographic modules).

Strong Presence in security-conscious organizations and Industries

Governments, R&D, High Tech, Financial Institutions, Lotteries, Oil & Gas, etc.
