

## DUSK Home Edition for Personal USB Device Protection

The number of mobile workers is expected to soar to more than 850 million worldwide in 2009. The ability for people to work from any location is due in part to the increasing availability of portable computers, mobile devices and high-speed communication technologies. Sensitive data has become equally more mobile and the risk of loss or theft of sensitive information has grown exponentially.

## DUSK Home Edition for USB flash drives

DeltaCrypt's DUSK USB Key Protection enables to secure mobile data on USB flash drives with simple drag'n drop encryption technology. Its uniqueness resides in its easy-to-use features combined with public key encryption to protect USB mass storage devices. DUSK is a patent-pending technology.

### How DUSK works

- Entering a User password opens up the DUSK Home Edition application. Once opened, to encrypt files, the User drags 'n drops files from the DUSK Home Edition left pane showing the User workstations to the DUSK Home Edition right pane representing the USB drive. The reverse action is also true to decrypt files placed onto DUSK-protected drives.

### DUSK Home Edition Benefits

- Installs on various USB mass storage devices regardless of size, brand or type
- Lets User determine if a file needs protection on his drive or not
- Easy intuitive encryption

### DUSK PROTECTION FEATURES

Drag'n Drop USB Key Encryption	No Software on Host PC required (driverless)
Works with USB flash memory drives, USB hard disk drives, memory cards, Firewire	Combines unprotected partition to protected partition
Works with limited (User) and unlimited (Administrator) privileges	Windows 2000, XP, Server 2003 and Vista <b>New</b>

DUSK Home Edition is an affordable USB drive protection that lets anyone secure the sensitive files that require protection while others remain accessible on the drive. No training required!

## Why DeltaCrypt?

DeltaCrypt was created to provide organizations management with genuine peace of mind for more and more valuable corporate mobile data. From customers' data to collaborative exchanges and communications, DeltaCrypt offers protection for sensitive data against external and internal intrusions.

### **Complete range of encryption products**

DeltaCrypt offers a complete range of public key encryption applications. Whether you wish to protect your PCs, data exchanges, emails, USB flash memory drives, as well as your backups, DeltaCrypt offers you the right solution.

### **Custom-Built Solution**

Don't let your organization's special requirements keep you from protecting sensitive corporate data. Any of the DeltaCrypt public key encryption solutions can be adapted to your environment.

### **Patent-pending technology**

DeltaCrypt DUSK and DUSKWatch are patent pending.

### **FIPS 140-2 Certification**

Pending application for FIPS 140-2 Certification (the Federal Information Processing Standard--FIPS--Publication 140-2 is a U.S. government computer security standard for accrediting cryptographic modules).

### **Strong Presence in security-conscious organizations and Industries**

Governments, R&D, High Tech, Financial Institutions, Lotteries, Oil & Gas, etc.

### **Canadian software products**

DeltaCrypt Technologies Inc. is a privately-owned Canadian company located in the Province of Quebec.
